

HeyPhone External Components Wiring - Issued: 25-May-21

Change from 01-Dec-02 Version: Microphone section redrawn to better illustrate internal wiring arrangement and to remove interconnection shown in microphone wiring between Mic. Earth (PL2/5) and Earth (incorrectly labelled PL2/1).

Modification of Mic1 involves replacing standard plug by PL2, using pin 1 of switch as a binding post for the wires to the microphone insert and the cable screen.
