PUBLISHED by the CAVE RADIO & ELECTRONICS GROUP of the British Cave Research Association. The group aims, by means of a regular Journal, other publications and meetings, to encourage the development and use of radio communications and other electronic and computer equipment in caving and related activities.

BCRA's Registered Office: The Old Methodist Chapel, Great Hucklow, BUXTON, SK17 8RG. BCRA is a UK registered charity, no. 267828. It is a constituent body of the British Caving Association, undertaking charitable activities on behalf of the BCA.

The copyright owners assert their Moral Rights to the maximum extent possible under the Design, Copyright and Patents Act 1988 and any applicable subsequent Acts. Subject to statutory exception and to the extent permitted in this notice no material may be reproduced by any method without permission of the copyright owners. The authors' opinions are not necessarily endorsed by the editor, nor the BCRA. Online publications may be downloaded onto a hard disk or printed for your personal use provided that you include all copyright statements and that you make no alterations to them and that you do not use any of the pages in any other work or publication in whatever medium stored.

SUBSCRIPTION RATES (Four Issues)

United Kingdom	£11.00
Europe (Airmail) / Rest of World (Surface Mail)	£18.00
Rest of World (Airmail)	£21.00
Paperless electronic subscription	£4.00

These rates apply regardless of whether you are a member of BCRA or BCA.

Our preferred method of payment is online at (creg.org.uk / pay). However, if you wish to pay by cheque, please send your payment to the BCRA membership office (address above). Your cheque should be drawn on a UK bank and made payable to BCRA (Please do not make it payable to CREG). Payment from outside the UK is easiest online, by credit card at (creg.org.uk / pay). Alternatively, your bank may be able to give you a cheque drawn on their London branch. We can also accept electronic transfers - please ask us for our IBAN and SWIFT codes. Please note that we will not accept any form of payment where we have to pay a transaction fee - all fees must be paid by the sender. Payment by cash is not advised. If you need to send cash, please contact the editor first to receive the latest advice.

Complimentary copies of the Journal are sent to other similar organisations and deposited at the UK Caving Library and the British Library.

DATA PROTECTION ACT (1998)

Exemption from registration under the Act is claimed under the provisions for mailing lists of non-profit organisations. This requires that consent is obtained for storage of the data and for each disclosure. Subscribers' names, addresses and other necessary contact information will be stored both on paper and on computer. Information may be stored at more than one location by officers of the group but will not be disclosed to anyone else without your permission. You must inform us if you do not consent to any provisions in this notice.

Table of Contents

Newsheet	3
Cave Technology Symposium, Tratman Award Shortlist, Editorial Team	
A Low-cost Leaky Feeder System for Cave Communication	4-6
Radio amateur Fabrizio Marincola , IOHCJ, describes a leaky feeder system using ordinary low-cost coaxial cable. Practical details are provided allowing others to duplicate the system underground.	
We Hear	7
News and events – Mike Bedford brings us the latest to impact the world of cave radio and electronics. DISTO Links to Smartphone, Spectrum Challenge, Energy Harvesting Development Kit, Learning from Blind Cave Fish, DIY Quadcopter.	
Building LED Lights for Cave Photography – Part 2	8-10, 18
As an alternative to electronic flash guns, high brightness LEDs now provide an attractive form of lighting for cave photography. Following his introduction to continuous lighting and describing his choice of LED in the last issue, Footleg discusses the rationale behind his choice of driver.	
3D Printing for Cavers – Introducing the Technology	11-13
3D printing might be enjoying massive growth and hype but, according to Mike Bedford and Martin Melzer , it has caving applications too. Here they separate the facts from the hype.	
Getting Physical with 3D Cave Modelling	14-15, 24
We're used to seeing virtual 3D models of caves on-screen but, according to Mike Bedford , 3D printing allows you to create a physical cave model that you can hold in your hands. Here he describes several ways of producing 3D-printed cave models and illustrates the technique with some real-world examples.	
3D Printing your DIY Project	16-18
Martin Melzer describes how you can use the up-and-coming technology of 3D printing to produce customised parts for your cave electronics project.	
Letters to the Editor	19
Dowsing, Dowsing – Maybe, Dowsing – Maybe Not.	
Web Watch	19
Peter Ludwig takes another look at the internet.	
Surveying Nottingham's Archaeological Sandstone Caves	20-23
The city of Nottingham is riddled with man-made archaeological caves. Dr David Strange-Walker of Trent & Peak Archaeology describes how these caves are being surveyed using 3D laser scanning and HDR photography to present the results as plans, elevation maps, isometric images and virtual fly-throughs.	
The Adventures of GREG	24
Illustrations by Adrian Higgins with words by Mike Bedford .
